TLR
HYDRAULICS INC.

Discover the TLR Difference

For more than 70 years, our family-owned business has set the standard for excellence in hydraulic repairs. TLR Hydraulics, Inc. represents the coming together of former owners of notable hydraulic companies: Rupe's Hydraulics and Lantex Hydraulics. This combination of more than a century of combined knowledge means a wealth of experience and expertise is brought to each project.

Our only goal is your success!

- **We back our work with the industry's leading warranty: One year warranty on all rebuilt components.**
- **We deliver exceptional customer service through fast response times and active communication.**
- **TLR Hydraulics has made the investment in skilled technicians and machinery to do all aspects of the job in house, meaning complete control over the quality and turnaround of work.**

You will see the family pride in our performance, and a dedication to your satisfaction!

Our In-House Work Means Faster Turnaround For You!

You will find the machine shop at TLR Hydraulics has the equipment and expertise to complete your repairs or fabricate custom hydraulics quickly and precisely, using state-of-the-art machinery:

- **CNC Machining**
- **Water Jet Cutting**
- **3-Axis Mill & Lathe**
- **Mill Work**
- **Pin Blowing Set-Up**
- **Line Boring**
- **Large Hole Lathes**
- **Large Honing**
- **Lapping Machine**
- **Tear-Down Bench & Torque Bench**
- **Pump Test Bench**
- **Cylinder Test Bench**
- **Large Press**
- **Welding: MIG, TIG, Stick, Heliarc**

“ *All of our work is done in-house! And these capabilities means that we can get your equipment up and running faster, and you are assured of having the hydraulic parts that perfectly fit your need.* ”

Reduce Down-Time & Increase Productivity

If your hydraulics are down, that equipment is out of business. TLR Hydraulics is prepared to repair any and all components of a hydraulic system, including:

- **Cylinders**
- **Hoses**
- **Pumps**
- **Swivels**
- **Motors**
- **Hammers**
- **Valves**
- **Power Units**
- **Pins/Bushings**

Our capabilities of hydraulic equipment repair can save you both time and money, avoiding the often high cost of purchasing new hydraulics.

We specialize in large parts for heavy equipment, with an exceptional team to provide you superior workmanship and customer service.

Exactly The Part To Suit Your Needs

Custom design and fabrication of hydraulic cylinders and power units sets TLR Hydraulics apart from others in the industry.

Extremely large barrels are an area of particular expertise, with our capabilities of cylinder honing up to 24-inch bore!

Every part – large or small – is tested before being released by our shop, ensuring the quality and the service our customers have come to expect.

TLR Hydraulics is an experienced full machine shop with a broad range of materials including stainless steel, aluminum alloys, carbon / tool steels and more, and can produce perfect parts every time.

You will also discover that we have one of the largest inventories of chrome in the country – both standard and metric.

Service To Every Industry

No matter what industry you operate in – or the size and type of your hydraulics equipment – TLR Hydraulics can repair it. In fact, we probably have done similar work hundreds of times before!
